COMPANY PROFILE

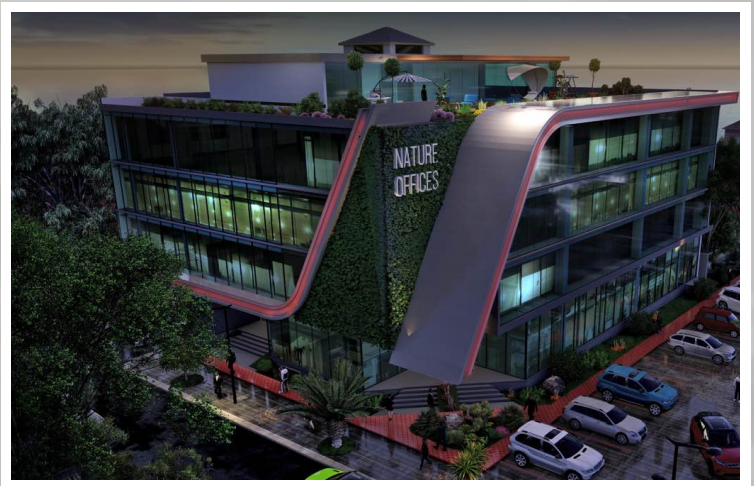

ABOUT US

Adamas Group is a reputed name in the industry, creating matchless architectural masterpieces since 2012. Our team of experienced engineers and architects work with dynamic technical personnel in Tanzania to bring the most splendid design solutions.

Our Progressive Growth

Since our inception in 2012, our ambitious goals have materialized into impressive solutions that have driven us towards undeniable growth. Our innovative high-technology and focus on quality is drawn and inspired from the Turkish construction sector.

Till date, we have successfully completed more than 40 projects, converting raw spaces into modern architecture, sleek interiors and remarkable business ventures.

The Adamas Group offers impeccable construction and design solutions for projects in Tanzania.

About projects

Adamas Group is passionate about bringing your vision to reality. Our capability expands to offering construction and design expertise to a diverse market, from start-ups to corporate and mega project entrepreneurs. See how we have converted basic spaces into impressive set-ups. Glance through some of our projects we have worked for reputed clients in Tanzania

Our social responsibility CSR

Adamas Group recognizes and celebrates its social responsibility and takes pride in building community spaces that thrive with vibrancy. Besides building commercial spaces, Adamas supports projects that contribute towards the betterment of the society and help the beneficiaries take advantage of our superior infrastructure.

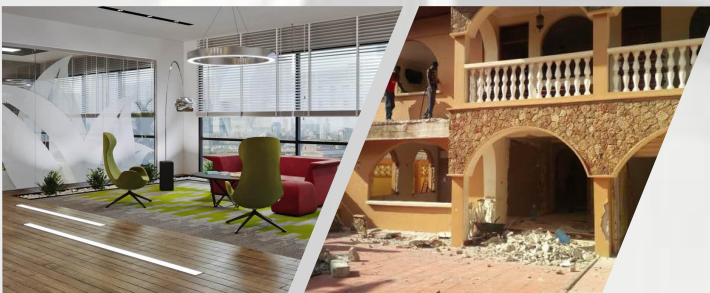

As a member of Ashure Foundation, our CSR responsibilities play a huge role in our success with our contribution development projects in Tanzania.

ADAMAS GROUP FIELD OF OPERATION

Construction - Next Generation Co.

We bring to life your visualized projects and assure that each project complies with applicable regulations, standards and codes.

Interior Design & Renovation - Adamas Co.

We apply art in all areas by creating spaces that exude a luxury aesthetic that retains functionality and practicality.

We also provide top-notch furniture design and production with high quality materials.

OUR VALUES

Honesty

Our client relationship begins with trust and respect. We are passionate to work with you and deliver the highest quality.

Commitment

We are here to work with you from the start to finish. Our acceptance to work is our promise to deliver the best.

Team Work

Your success is defined by our team effort. Our individual experts come together and work for your fulfilment.

Privacy

Every client is unique and valuable to us. Our practices are embedded in confidentiality and integrity for all our clients, partners and expert team members.

Our responsibility

We take full charge of dedicated projects, giving our clients a breath of convenience and confidence. Also, we take a responsible approach to business - we pay taxes at our revenue-generating locations and support local communities. We are convinced that such a business model allows for long-term, stable development in the modern world.

Innovative

Creativity defines our essence of growth. Our designs are tailor-made and showcase the brilliance of our mastery in architecture and construction.

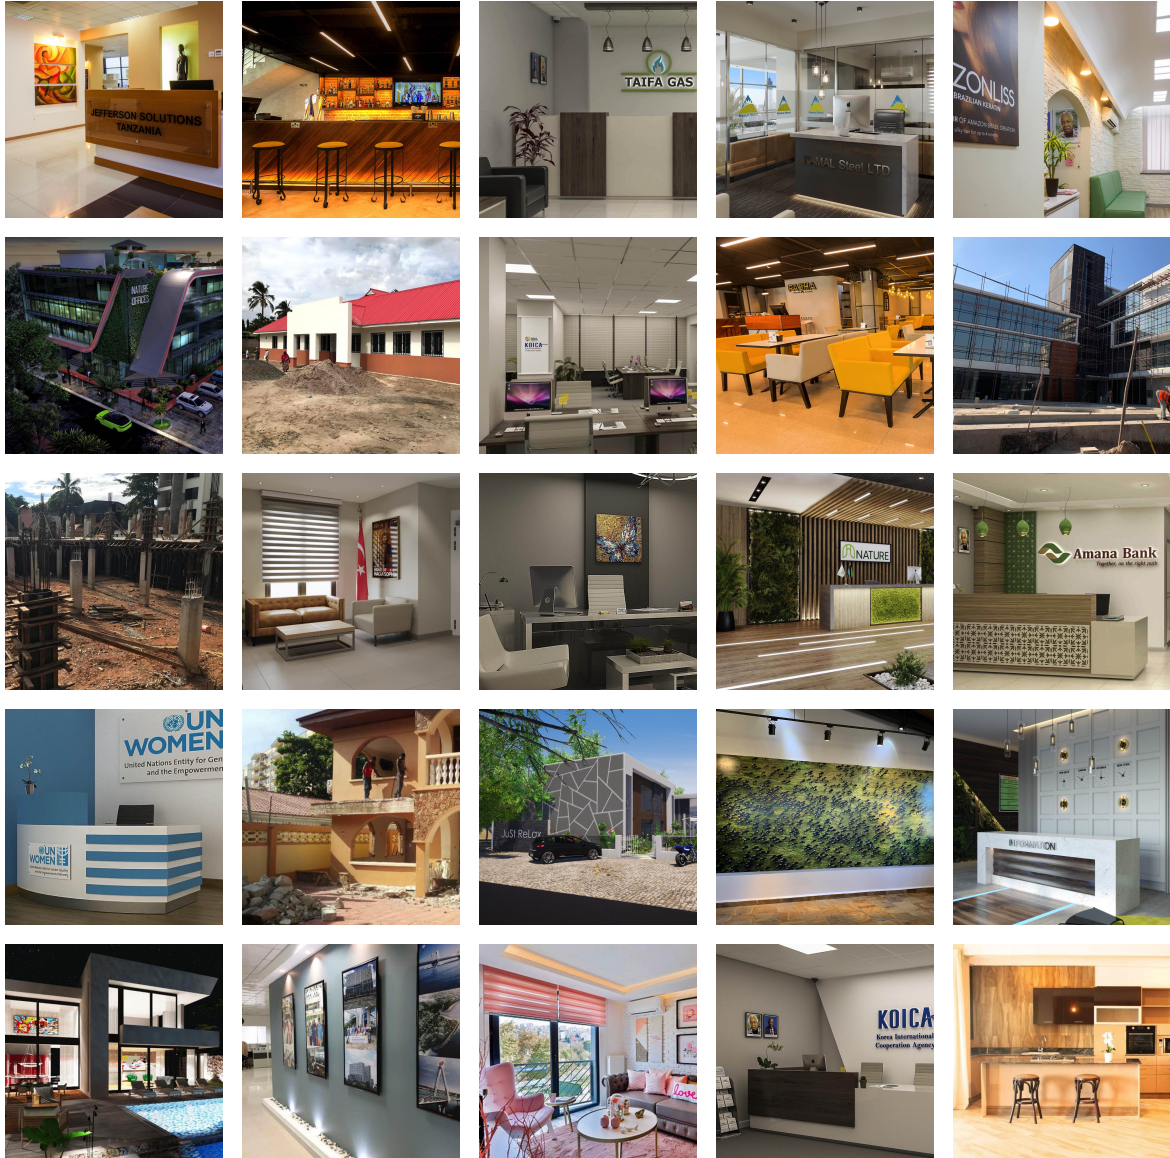

VISION

To become a distinguished and reputed architect, design and construction expert known for delivering high quality design and services.

MISSION

To strive each day with excellence and convert ideas into brilliant designs that are practical, impressive and as unique as our clients.

Stone Panel

art on the wall

Kilimanjaro

Arusha

Moshi

Mwanza

Panel Section 1.5 cm

Size 2.80m x 1.30m

Advantages of the Stone Panels.

1. It gives similar touch, look, texture and relief as natural stone, bricks and concrete surfaces, it also makes up for the disadvantages of natural stone, bricks and concrete. These include bulk, high purchase and fitting cost & availability among others
2. Natural stone panels are made of fiberglass and are easily installed to typical wall and ceiling surfaces
3. Extra costs like painting and insulation will not be needed as they panels substitutes this stage.
4. It is not affected by water and moisture and thus it is easily applied to areas exposed to these conditions and resolves such problems.
5. It stands up to adverse conditions, which frequently damage natural stone applications such as cracks/scratch formation, zonal disintegration and breakage on the surface of the stones.
6. Easy application on every surface, it cannot affect the structure in any way and it does not add an extra load on the interior or exterior of the building, and it also minimizes the cost of dismantling whenever needed.
7. It can be drilled and cut of different sizes, any decorative material can be hung on it.
8. Using the panels, you can create column/pillars and arches as well as make partition walls, fire places, as the materials have non-combustible stone wool core.
9. Stone panels with the help of dowels and screws offer a practical and impressive solution that will save time during installation for places that require decoration changes especially in hotels, sports and spa centers, cafeterias, restaurants, shops and commercial establishments
10. Depending on the structure of the ceiling, on the surfaces where the stone coverings such as ceilings are very risky and costly, it is possible to install it either by direct tilting or by bending them over to give curvature shapes
11. They do not cause any damage/harm to the applied surfaces except for screw holes which are then sealed and finished to match the stone panel design.
12. Reduces construction work, air pollution and messy material handling (sand, cement, etc.). They have very low environmental impact.
13. Building and construction permit not necessary needed.
14. Fiberglass panels can be given different forms/shapes, thanks to its flexible structure, cylindrical surfaces can be created as well.
15. It can be mounted on portable stands due to its light weight.

*Stone Panels are participation of the Adamas Group

Furniture Manufacture
